

Parul University
Faculty of Engineering and Technology
Parul Institute of Engineering and Technology
Computer Science & Engineering Department

Subject Name	Operating System	A.Y	2025-26
Subject Code	303105251	Semester	4th sem
Chapter-6			
Sr No	Question	COs	B.T
1	What is an I/O device?	6	1
2	What is an interrupt?	6	1
3	What are file access methods?	6	1
4	What is free-space management?	6	1
5	What is SSTF scheduling?	6	1
6	What is boot block?	6	1
7	What is disk formatting?	6	1
8	What is FCFS disk scheduling?	6	1
9	Explain file system structure with neat diagram	6	2
10	Explain free-space management using bit vector, linked list, and grouping.	6	3
11	Explain SCAN and C-SCAN disk scheduling algorithms.	6	3
12	Explain file system structure and various layers involved	6	3
13	Explain the structure and working of device controllers.	6	2
14	Explain file access methods: sequential, direct, indexed.	6	2
15	Explain directory implementation using linear list and hash table.	6	3
16	Compare FCFS, SSTF, SCAN, and C-SCAN.	6	3
17	What is a bit vector in free-space management?	6	1
18	What is indexed allocation?	6	1
19	What is device-independent I/O software?	6	2
20	Explain file system design including directory structure, allocation methods, free-space management, and performance issues.	6	3
